

Order Time Mobile - Managing Work Orders

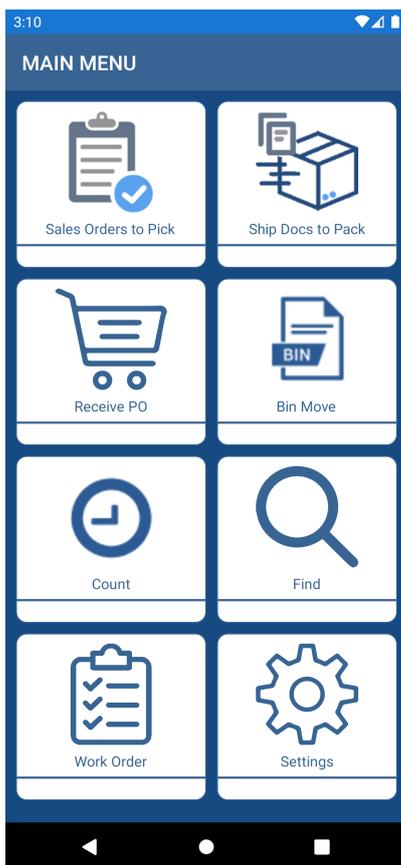

Last Modified on 02/20/2024 7:52 pm EST

Overview

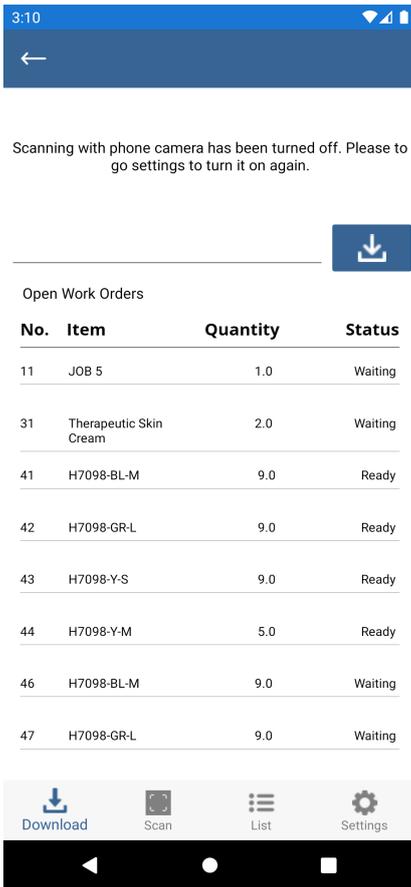

This article is designed to showcase the capabilities of the Order Time Mobile App in managing work orders directly from your mobile device. It provides a comprehensive guide on how to efficiently handle and oversee **work orders** and **production**, emphasizing the app's functionality in streamlining this process for users on the go.

Steps for Managing Work Orders on the Mobile App

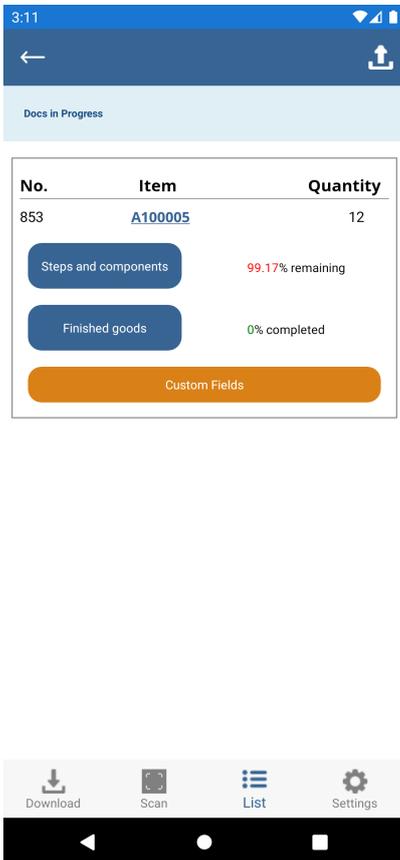

1. **Home Page:** Access the home page of the mobile app. Select **Work Order**

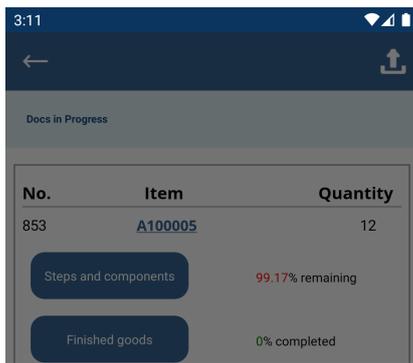

2. **Download Work Orders:** To manage work orders on the mobile app, first download the desired work order created in the web version of Order Time Inventory. Downloading a Work Order is similar to downloading a Sales Order or Purchase Order via the mobile app. You can swipe to download, or enter the Work Order number and press the download icon, or scan a barcode representing the Work Order number.

3. **View Work Order:** After downloading, you can view the work order in the app, including the status of each step, the components being used, the amount of the Work Order remaining, and the quantity being created.

4. **View Steps and Components:** Within the work order view, you have the ability to view the steps and components involved.

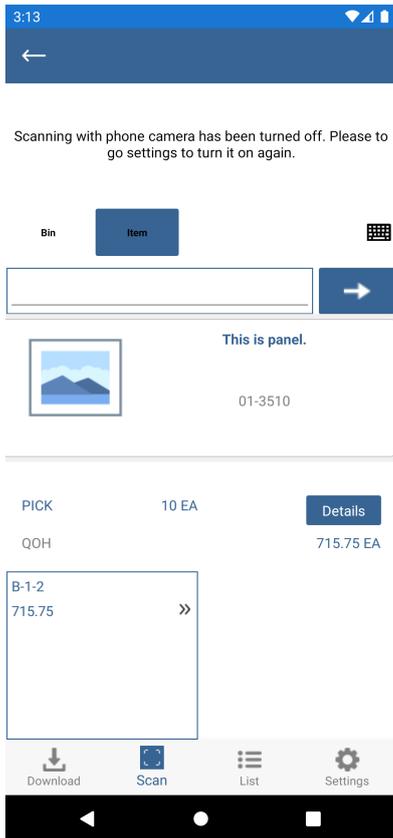

Work Order #853

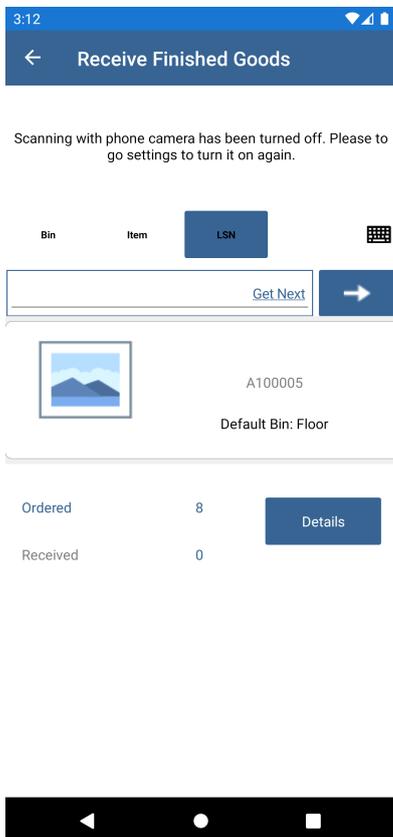

Step	Time to Complete	Status
Picking	12 HR	Waiting
Bend	180 MIN	Waiting

Item	Required	Remaining
Co packing	24	24
1111	24	24
115	12	12
01-3510	12	10
100	24	24
112	24	24
113	24	24

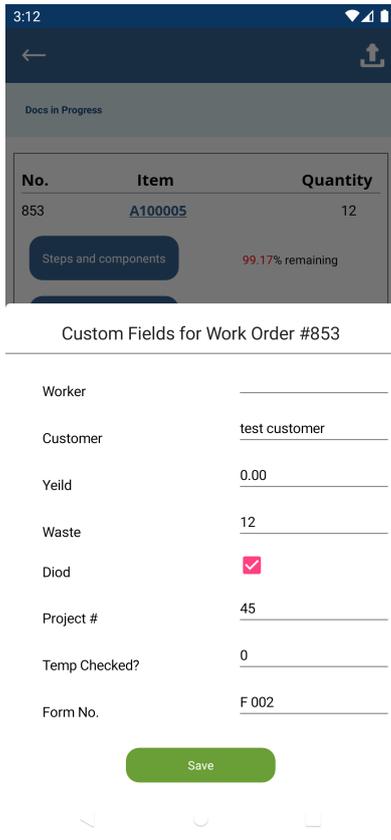

5. **Allocate Components:** Proceed with component allocation as needed.

6. **Receive Finished Goods:** This step involves receiving the finished goods, as the Work Order is completed. You can select the Location/Bin that it will land in. You can also take advantage of the Get Next link within the LSN (Lot / Serial Number) tab. With this feature you can generate the next number and apply it to your Finished Goods.

7. **Set Custom Fields:** Update custom fields associated with a work order directly from the mobile app. You set up the custom fields in the Order Time Web App, just like [in this article](#). Then you will have access to fill them in within the mobile app.

The screenshot shows a mobile application interface. At the top, the time is 3:12. Below the status bar, there is a navigation bar with a back arrow and an upload icon. The main content area is titled "Docs in Progress" and contains a table with the following data:

No.	Item	Quantity
853	A100005	12

Below the table, there is a button labeled "Steps and components" and a progress indicator showing "99.17% remaining".

Below the table, there is a section titled "Custom Fields for Work Order #853" with the following form fields:

Worker	_____
Customer	test customer
Yeild	0.00
Waste	12
Diod	<input checked="" type="checkbox"/>
Project #	45
Temp Checked?	0
Form No.	F 002

At the bottom of the form, there is a green "Save" button.
